

BioManager Professional 9.0

Product Information

BioManager Professional 9.0 and Morpho Access Biometric Terminals provide a seamless, comprehensive solution for Time and Attendance, Access Control or combined applications. BioManager provides you operational control with features like Group based policy settings, Centralised Management, Comprehensive reporting and easy Terminal configuration.

For Access Control applications, use BioManager to set up the 26-bit Wiegand or Closed Contact output in your Morpho Access hardware. 26-bit Wiegand output provides a secure interface to other Access Control Systems or a Door Relay module.

For time and attendance applications, BioManager Professional 9.0 automatically exports data files to many payroll systems including: Comacc, Preceda, Timeminder, Powerforce, Roster On, and MYOB Enterprise. If an exporter does not exist, Identity One will provide one to suit your specific payroll software at no additional charge.

With a range of powerful features, BioManager Professional 9.0 has been designed to be a cost efficient and easy to use tool to enhance your business processes and save time and money.

Features

- Supports up to 10,000 users
- Supports up to 200 Morpho Access Biometric Terminals
- Supports up to 10 Clients
- Stores 1,000,000 Access Logs
